
Cove Mountain RV Resort

Wastewater System Recovery & Compliance

WASTEWATER TREATMENT & DRIP DISPERSAL SYSTEM

The Challenge

Cove Mountain RV Resort was experiencing significant issues within its drip dispersal field and overall compliance program. Portions of the field remained saturated and exhibited standing water, creating concerns regarding proper effluent dispersal, regulatory compliance, and long-term system performance.

Additional challenges included

- Wet and saturated drip field conditions
- Inconsistent laboratory sampling and reporting
- Regulatory compliance concerns
- Need for qualified operational oversight
- Requirement for a Corrective Action Plan (CAP)
- Risk of losing operational approvals and regulatory standing

CLIENT

Cove Mountain RV Resort

Wastewater Treatment & Drip Dispersal System

The drip field exhibited excessive moisture and poor drainage characteristics.

Before Improvements

SITE CONDITIONS

Site conditions prior to corrective actions included saturated areas, standing water, and poor field performance.

WYN Services Group Solution

WYN Services Group was engaged to stabilize operations, restore compliance, and improve field performance. Our scope included:

01 Operational Management

- Provided a qualified wastewater system operator
- Established routine operational inspections
- Implemented proactive maintenance procedures
- Monitored field conditions and system performance

02 Regulatory Compliance Support

- Coordinated and managed laboratory testing schedules
- Ensured required sampling and reporting deadlines were met
- Organized compliance documentation
- Maintained communication with regulatory agencies

03 Corrective Action Plan Development

- Assisted in developing and implementing a Corrective Action Plan (CAP)
- Evaluated field performance issues
- Recommended operational and maintenance improvements
- Documented corrective measures for regulatory review

04 System Recovery Efforts

- Improved field management practices
- Reduced saturation issues
- Restored proper utilization of the dispersal area
- Enhanced overall wastewater system performance

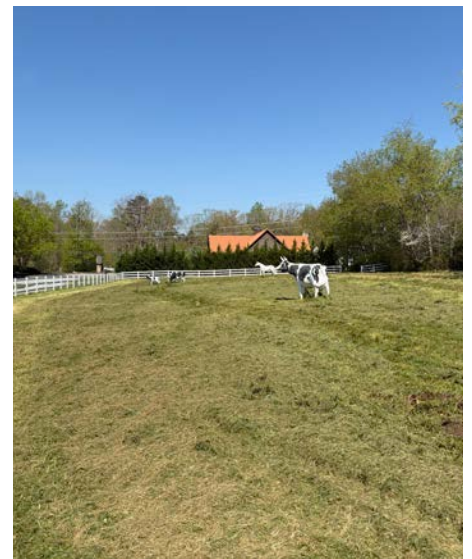

05 SOP Reinstatement

- Worked with regulators and stakeholders to address deficiencies
- Provided operational documentation and compliance support
- Assisted in obtaining reinstatement of the facility's operational approval/SOP

Results

AFTER CORRECTIVE ACTIONS

The field showed substantial improvement following implementation of operational controls and corrective measures.

Field conditions after corrective actions: reduced saturation and restored utilization of the drip dispersal area.

Achievements

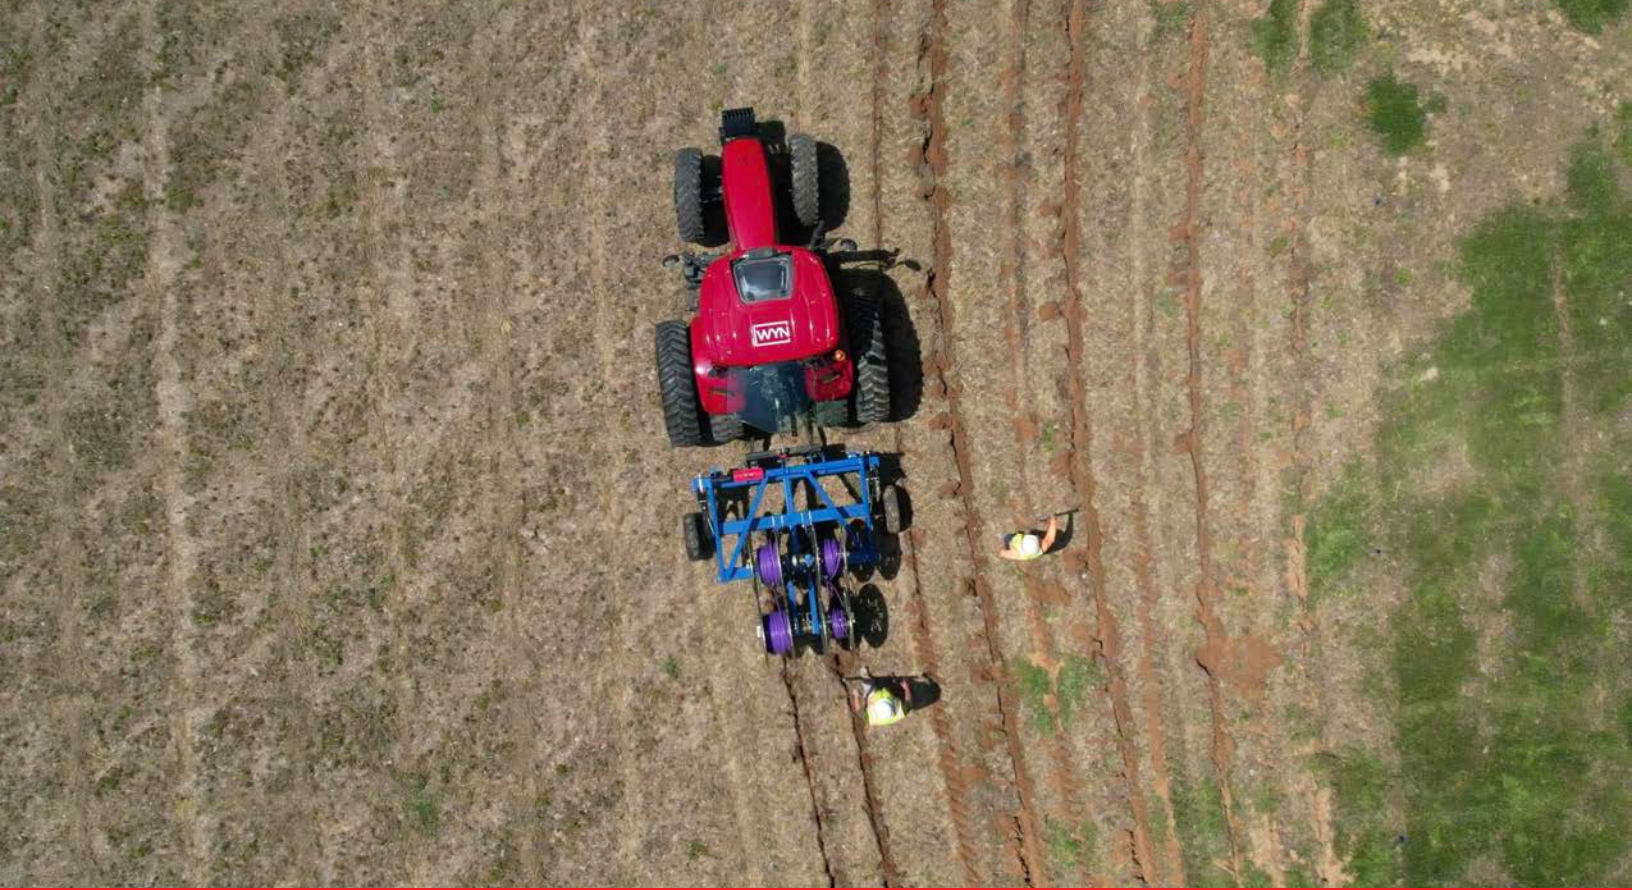

✓ Reduced standing water and saturated field conditions	✓ Restored effective utilization of the drip dispersal area
✓ Established consistent laboratory reporting procedures	✓ Provided ongoing certified operator oversight
✓ Assisted with development and implementation of a Corrective Action Plan	✓ Improved regulatory compliance posture
✓ Helped secure reinstatement of the facility's SOP	✓ Created a sustainable framework for long-term operation and maintenance

PROJECT IMPACT

Through a combination of operational management, compliance support, and corrective action implementation, WYN Services Group helped Cove Mountain RV Resort transition from a system experiencing compliance and field performance concerns to a more stable and sustainable wastewater management program.

The project demonstrates the value of proactive operation, regulatory coordination, and experienced wastewater management in restoring decentralized wastewater systems to compliance while protecting both public health and the environment.

SERVICES GROUP

Building, Operating, and Maintaining Decentralized Wastewater Systems

- Operations & Maintenance
- Corrective Action Planning
- Wastewater System Troubleshooting
- Regulatory Compliance Assistance
- Drip Dispersal System Rehabilitation
- Construction & Rehabilitation Services

"Helping communities and property owners keep wastewater systems operating efficiently and in compliance."

EXPERIENCE THAT COUNTS
